Audiomica Laboratory

Genimedes Ultra Reference 喇叭線

文 | Megan

Audiomica Laboratory from Poland has up to 6 series, each series has a variety of different categories of choice. The most advanced is the Consequence Series, all with 7N OCC copper conductor and TPE dielectric.

The Ultra Reference Series takes the second top place. This series is originally made of the highest 925 jewelry grade silver as a conductor, but in some models OCC copper is used. The line contains 5 products.

The main Genimedes speaker line with the use of two connection terminals; positive and negative. Each conductor consists of 260 helical twisted sterling silver microconductors, with the outer diameter of the cable 12 AWG, extruded FEP dielectric material, silver shielded to resist electromagnetic interference, and manually refined. The cable is manufactured in the limited series and is available on special order only. Callisto power cord contains OCC copper conductor with the outer diameter of the cable 8 x 12 AWG, extruded FEP dielectric material, a layer of copper shielded network. It is also a limited production. Europa M3 single-ended signal line, consists of a 7-core (7 x 21AWG)

silver conductor, 2 layer silver mesh, coaxial design, PTFE dielectric.

Europa XLR is a balanced signal line, with 8 x 18 AWG silver-plated OCC copper conductors, shielding with a layer of silver mesh and one layer of aluminum.

Quan is a speaker cable (jumpers) with 2 x 20AWG silver plated OCC copper conductors.

In this Ultra Reference Series, the models have their own independent production line, which is very special.

完全靚聲

In recent years, the introduction of European products has had very positive feedback, in particular Signal Projects from UK, as well as four Polish brands: Audiomica Laboratory, KBL Sound, Gigawatt, Franc Audio Accessories. (The full text is recorded in Hong Kong "Hi Fi Sound" June 2017).

The protagonist of this article, Genimedes Ultra Reference speaker cable is undoubtedly the heart of the reasons, together with Liang's sounds. There is the good price for the quality of the sound, completely beyond imagination, not only value, the sound is invincible (in my limited experience)!

First, I picked Diana Panton "I Believe in Little Things", replay Sesame Street theme song "Imagination", a voice let us see Genimedes' sound as of the charming place, it is very warm and round, full of flexibility, the texture is ideal. Obviously, the more we used the Audio Note ISIS LX168 the better metamorphosis we heard. It is just a simple and easy song, and Genimedes sounds gave it the feeling of curiosity and interest!

Genimedes' sound is not only sweet, but also quite energetic and dynamic. Once replayed the same CD with the Carpenters classic song "Sing", Genimedes is able to restore the piano's bright and vibrancy, it is full of vitality, every hit is like a moving light, in addition to the energy, which is not only abundant, but also looks like a sweet moist. Genimedes also appears to be born outside the fierce and charm, it is also full of a jumping force, body shape, low frequency from the easy shock.

Come in. As for the song, needless to say, pretty so that I stare at the audio and video, not willing to blink; then, I see Diana Panton, smiling, her skin under the moisturizing mask of CC Cream, perfectly presented!

Thanks to Genimedes deduction, Lu Guanting's song also attracts to be listened! "Beyond Imagination TOO" album is also super pretty, in "The wind Continues to Blow" the guitar has a crispy bounce, "People Like The Spray" and "Ripples" feature low frequency that reproduces rich and full energy, good control, not soft, not swollen, it came out like an earthquake. Genimedes brought me the unexpected high-quality & low-frequency satisfaction!

The rehearsal of the Macao, elite chamber band's "String Dance" album of the same name movement, with Genimedes deduction comes with the high frequency string sound, sweet and lively, with high degree of rhythm, bass strings sound level full of toughness, cautious, rapid and strong, "pull string effect" is clearly presented, showing the strong power and momentum, exciting, sound field is deep and three-dimensional, which creates a good separation.

Genimedes sound features harmony and kindness, but it is also vivid and meticulous. Replay "String Dance" in the action of the slow motion of "Andalusian romantic song" can bring out the soft romantic feeling, intoxicated, but in the replay from Rossini: plug Viera hairdresser "Figaro", it makes the string wiped hot, pulls out the bold and unrestrained atmosphere, smooth at the same time. The speed of this speaker line is visibly beautiful and comprehensive.

試音器材

- Accoustic Arts Drive II CD轉盤 (Burmester電源線)
- Accoustic Arts Tube DAC II mk2解碼器 (Analysis Plus新Power Oval 2電源線)
- ModWright Instruments LS 36.5DM前級 (Analysis Plus Ultimate Power Oval電源線)
- Hegel H30功放 (IsoTek EVO3 Syncro電源線)
- B&W 802 D3揚聲器
- Chord ChordMusic AES/EBU數碼線
- VooDoo Cable Stradivarius Amati Edition平衡訊號線 (解碼器→前級)
- kbl Sound Himalaya平衡訊號線 (前級→功放)
- Audiomic Laboratory Genimedes Ultra Reference喇叭線

We used in the big room ISIS LX168 speaker cable which has the ideal low-frequency replay conditions. In contrast, Genimedes can be more rounded and flexible, the sound is more calm, but the weight and speed diminished, followed by the abundant darkness, mute can be drunk away.

Genimedes voice is sweet and smooth, rounded with flexibility, and the energy is abundant, high speed fast, good control. In the replay of heavy scenes heavy low-frequency recording also gives an outstanding performance in the "I Believe in Little Things" bouncing tendon, "Beyond Imagination TOO" heavy low-frequency, "string dance" sharp rub string sound, we know its powerful. In the replay of Klazz Brothers & Cuba Percussion "Tango Meets Cuba", Genimedes gives even more energy and dynamic power, here is full of Cuban dynamic rhythm characteristics and tango style music to reproduce the heat, just the first six works of "Ole Guapa", accordion and piano dynamic tango dancing, both beautiful and moving, but also people hear the blood boiling, exciting cheers!

As for the Valery Gergiev conductor Kirov Orchestra "Mikhail Glinka: Russian and Ludmilla Overture" and James Levine directed the Berlin Philharmonic Orchestra / Arcadi Volodos Piano "Rachmaninoo 3rd Piano Concerto" live recording, Genimedes shows its superior complex; big scenes to reproduce the ability, structured, dynamic and powerful state of calm and beautiful sound, style and it is so moving!

樸實無華 全憑實力

This is a sound feature of the Genimedes, which reminds me of the VooDoo Cable Stradivarius speaker line (the latest generation of Stradivarius Amati Edition I have not heard), with the kind of calm and intoxicating music.

However, Genimedes can be more powerful than the first generation of Stradivarius Hi-Fi power, people are more excited to hear.

Genimedes Hi-Fi power and music heat and Audio Note SOGON Minor LX62 speaker line trend are worth more than 10 million Hong Kong dollars, even if the latter can be more open and spectacular, more shocking, more moisturizing, with high density, but the former is greatly out of sight; Genimedes is powerful!

We have recently auditioned some of the strength of the speaker line, in addition to SOGON Minor LX62, there are Chord Music and ZenSati Authentica. ChordMusic speaker line focus is good, with clear lines and bright sound. Authentica speaker line is mighty, low-frequency stable, with strong impact. Compared with Genimedes, ChordMusic and Authentica will be more adept at a precise and solid analytical ability, in the unselfish attitude of the sound neatly arranged. Genimedes is different, the sound is sweet and moist, with the dynamic ups and downs between the elasticity, sound expression is cordial and pleasant, and even arouses reverie! Genimedes sound direction is not like ChordMusic or Authentica; straightforward, impartial, but it is the same like romantic SOGON Minor LX62!

In my case, in the Genimedes speaker line half of the audition process is a kind of enjoyment. It is also in my mind to establish a high position to it. Its wonderful voice performance makes I want to listen more to hear more. Welcome to Audiomica Laboratory which provides such a high level of performance at such a low price.

Genimedes looks plain, did not spend a lot of cost for its body, but it is winning thanks to the strength of the great, pearl like feeling. I believe no opponents can go beyond that sound, and that price!

Straight after the audition, I cannot wait to visit Leo's shop to ask if I can borrow Genimedes for longer. I'll listen and refer to it later!

At the manufacturer's website it is noted that this model's production is limited. I hope there is still a sufficient amount of them left to meet the local enthusiasts' needs.

Distributor: Shop price: HK \$ 25,500 (2.5M pair).
